With an eye to the future, Lensman PhotoGraphics has purchased a new, 3300 square foot studio in the heart of the Denver Metro Area's fastest growing commercial/industrial district. Since this is an area that few people are familiar with (yet), the following instructions should help you to find our new home.

From most locations in the Metro Denver area, find your way to the intersection of C-470 and Santa Fe (also listed as US Hwy 85). This is in the southwest edge of the metro area, just west of Highlands Ranch.

Take Santa Fe south 4.6 miles to Titan Parkway. There is an off-ramp and Titan Parkway lies just north of the Santa Fe rail yards and just south of the TCI Downlink Center (recognizable from the many large satellite dishes on and around it).

(From Castle Rock and points south, get on US-85 just north of Castle Rock by taking exit 183 or 184 and follow signs to US-85 North. Go about 11 miles to Titan Parkway.

Turn west (right form the north, left from the south) on

Titan Parkway. At the bottom of the overpass you will come to Titan Park Circle on your left. Turn left on Titan Park Circle, then turn left into the first parking lot on your left. This is a long beige building with brown awnings and large garage doors alternating with storefronts. The third unit from the left is...

Lensman PhotoGraphics
9892 Titan Park Cir. #6
Littleton, CO 80125
